Industry Veterans Ancel and Barr Launch Design/Build Contractor Echelon Constructors LLC

Construction industry veterans Greg Ancel and Ryan Barr have founded Echelon Constructors LLC. The firm will focus on providing design/build services to the office, retail, senior living, warehouse/distribution, multi-family, parking structure and medical/surgical center sectors.

Echelon's approach is to facilitate a "cradle to grave" collaboration process across the entire project to achieve the utmost efficiency in design and delivery.

Prior to co-founding Echelon, Ancel was a partner and director of operations for ARCO Construction Co., Inc. He joined St. Louis-based ARCO in 1993.

Barr, a civil engineer, was a project manager and director of development for Brinkmann Constructors for the first 13 years of his career before transitioning to McEagle Properties and most recently, Parkway Construction Services.

For more on Echelon, visit www.Echelon810.com.
